IDENTIFIERS	*North Carolina

ABSTRACT

The class of 1998 was the first class required by North Carolina State Board of Education policy to meet a higher competency standard in reading and mathematics in order to receive a high school diploma. Data in this report about student performance on this standard were provided by each of the local education agencies in the state. The percentage of students passing the Competency Standard increases with each grade. Sixty-nine percent of 8th graders passed the standard in the 1998-1999 school year, while 75% of 9th graders, 84% of 10th graders, and 93% of 12th graders did so. There were fewer disparities in passing by ethnicity at grade 12, with all groups around 87% or better. At the end of grade 8, however, Black, Hispanic, and American Indian students passed at a lower rate than students classified as White, Asian, and Multi-race. School systems were implementing changes to increase the number of students who pass the Competency Standard early in their high school careers. Local education agencies and charter schools were implementing classes providing focused remedial instruction conducted during the school day and professional development programs and were practicing test-taking skills. Two appendixes contain the data collection report and a list of charter schools. (Contains 14 figures and 15 tables.) (SLD)

Acknowledgments

This report is the collaborative work of many individuals. The North Carolina Testing Program is conducted by the North Carolina Department of Public Instruction (NCDPI), Division of Accountability Services, Testing Section. Technical support services for the program are carried out in collaboration with the Center for Urban Affairs and Community Services at North Carolina State University under the Technical Outreach to Public Schools (TOPS) program.

Mildred Bazemore, Chief of the Testing Section, and Sarah McManus, Education Research and Evaluation Consultant at NCDPI, provided invaluable guidance in content and design. Andrea Barefoot, Education Research and Evaluation Consultant with TOPS, serves as liaison with NCDPI and leads the Analysis Group at TOPS. Betty Marsh and Alissa Berholc, Statistician/Analyst with the Analysis Group, collected and compiled the statistical data. Anthony Wells, Statistician, produced the statistical graphics. Mary Daly, Social Research Associate, assisted in quality control. Jeff LaBelle provided the cover and divider page graphics.

Thanks are due especially to the Regional Accountability Coordinators, and the Test Coordinators and Accountability staff at the 117 public school systems and the many charter schools who went to unprecedented lengths to organize, audit and confirm the data presented here. This report could not exist without the dedication of these professionals

Abstract

1998-99 Report of Student Performance on the North Carolina Competency Standard

Background

- The Class of 1998 was the first class required by State Board of Education policy to meet a higher competency standard in the areas of reading and mathematics in order to receive a high school diploma. The students graduating at the end of the 1997-98 school year had demonstrated grade level proficiency (Achievement Level III or IV) on the eighth-grade reading and mathematics tests, the competency tests or other acceptable screens.

- Data used to compile this report were provided by each of the LEAs represented.

Key Findings

- The percentage of students passing the Competency Standard increases with each grade. Sixty-nine percent of eighth-graders passed the Standard in the 1998-99 school year, while 75% of ninth graders, 84% of tenth graders, and 93% of twelfth-graders did so.

- There are fewer disparities in percent passing by ethnicity at grade 12, with all groups around 87% or better. At the end of grade 8 however, students in the Black, Hispanic and American Indian categories pass at a lower rate than students in the White, Asian and Multi-racial categories. This pattern holds for the classes of 2002 and 2003, with many minority students not passing competency by the end of grade 9.

- School systems are implementing changes to increase the number of students who pass the Competency Standard early in their high school career. LEAs and charter schools are implementing classes providing focused remedial instruction conducted during the school day, informing teachers, guidance counselors, and parents, and practicing test-taking skills. LEAs report the use of practice tests, classes providing focused remedial instruction and mentoring programs as particularly effective.

1998-99 Report of Student Performance on the North Carolina Competency Standard

Introduction

The 1998-99 North Carolina Report of Student Performance on the North Carolina Competency Standard provides information on student performance at the state, regional, and school system levels for students in the classes of 1999, 2000, 2001, 2002, and 2003. The data used to compile this report were provided by each LEA represented and are managed at the school and school district levels. The data were collected using a variety of strategies including analyzing electronically scored data files, reviewing student records, and reviewing class rosters generated during scoring. The LEA superintendent and test coordinator approved the data submitted from each LEA for this report.

The class of 1998 was the first graduating class required to pass the new standard. The new requirement represents a more rigorous standard than the old minimum competency requirement implemented initially in 1978 for the class of 1981. The new standard implemented by the State Board of Education in 1995 requires students to demonstrate mastery of grade-level competencies in reading and mathematics equivalent to grade 8 as described in the North Carolina *Standard Course of Study*. In order to demonstrate the requirement, a student must achieve performance equivalent to Achievement Level III or above beginning with the North Carolina End-of-Grade Tests in Reading and Mathematics administered at the end of grade 8. (A complete description of the four Achievement Levels for the North Carolina End-of-Grade Tests grades 3 through 8 is included in the Appendix of this report.)

Students who fail the initial screen beginning at grade 8 must be given at least one opportunity annually to take equivalent forms of the competency tests beginning at grade 9. Many school systems, however, elect to give students additional opportunities to retake the tests beginning as early as the summer after grade 8 and each year thereafter until the students pass the test(s). Students are required to retake only the tests they do not pass. According to legislation and State Board of Education policy, any students who fail to pass the competency standard by the end of the tenth grade are given focused remedial instruction and additional opportunities to take the test(s) up to and including the last month of the twelfth grade. In addition, students who have failed to pass the competency standard by the end of the last school month of the year in which the student's class graduates may receive additional remedial instruction and continue to take the competency tests during regularly scheduled testing sessions until the student reaches maximum school age (21).

The purpose of this document is to report the performance of students in the classes of 1999, 2000, 2001, 2002, and 2003 on the more rigorous competency standard.

Background and Findings

Background

- North Carolina General Statute 115C-174.11 mandates that the State Board of Education adopt tests or other measurement instruments which may be used to assure that graduates of the public high schools and graduates of non-public high schools supervised by the State Board of Education possess the skills and knowledge necessary to function independently and successfully in assuming the responsibilities of citizenship.

Graduation Proficiency Guidelines

- At its February 1995 meeting, the State Board of Education approved Grade-Level Proficiency Guidelines and Graduation Proficiency Guidelines which include replacing the old, less stringent North Carolina Competency Standard with more rigorous standards in reading and mathematics as measured by North Carolina End-of-Grade (EOG) Tests.

The New Standard

- Beginning with 1994-95 ninth graders, the new standard requires students to demonstrate grade eight proficiency by performing at Achievement Level III or above on the reading and mathematics competency tests in order to receive a North Carolina high school diploma.

Competency Requirement Guidelines

The new competency requirement guidelines also include the following:

- Establish Achievement Level III or above as the standard for Grades 3 through 8, and "grade level expectations" for grades K through 2, with required intervention/remediation for students not meeting the standard;

    - Require that the standardized transcript be issued at the end of each school year for ninth through twelfth graders; and,

    - Strengthen the recommendation concerning the use of end-of-course test scores for final grades by stating that the *scores* must be used in grading students.

Regulations Governing the Competency Tests

- Regulations concerning the competency requirement have not changed although the tests have been replaced effective with the class of 1998. With regard to the competency requirements, LEAs are legally required to:

Regulations Governing the Competency Tests

(continued)

- Test students beginning no later than grade 10 which has been subsequently changed to grade 9 effective with the passage of Senate Bill 1125;
- Offer remedial instructional opportunities to students not meeting the requirement;
- Provide additional opportunities for students to retake the tests as needed at least one time per year; and
- Provide seniors with an additional opportunity to retake the tests during the last month of school.

- LEAs are now required to test ninth graders each year which provides students with additional opportunites to take the test(s) and to receive remedial instruction.

Writing Objective and Open-ended Not A Part of the New Competency Requirement

- The new competency requirement includes multiple-choice tests in the areas of reading comprehension and mathematics. The writing objective test required under the old competency standard is not a requirement under the new competency requirement. The open-ended assessment at grade 8 is not a part of the competency requirement.

New Standard Effective with 1994-95 Ninth Graders

- The new competency standard is required effective with those students who were in the ninth-grade during the 1994-95 school year or beyond. (Students who entered the ninth grade prior to the 1994-95 school year are required to meet the old competency standard regardless of when they complete the requirements for a North Carolina high school diploma.)

Cut Scores for the Competency Tests

- The Achievement Level III or above standard requires a student to take the grade 8 end-of-grade tests in reading and mathematics or equivalent tests given as competency tests at the high school level.
  - The Achievement Level III performance on the EOG reading tests are scale scores at or above 156.
  - The Achievement Level III performance on the EOG mathematics tests are scale scores at or above 165.

- Students who do not achieve the above scores have not met the competency standard.

Test Administrations

- LEAs may schedule as many as three test administrations each school year: once in the **fall**, once in the **spring** (must

accommodate seniors), and once in the **summer**.

Test Administrations (continued)

- LEAs may schedule up to four test administrations for seniors.
- Each student who has failed to meet the requirement must be given at least one opportunity each year (beginning in grade nine) to retake the test(s) though LEAs may elect to give students an opportunity to retake the tests during each scheduled administration.
- Modifications and accommodations are available for students with disabilities or students who are limited English proficient.
- Different equivalent forms of the tests are rotated for each of the scheduled test administrations.

Screening on Other Measures to Permit Students to Satisfy the Competency Standard

- If a student has scores from the grade 8 EOG reading comprehension and mathematics tests, the scores must be used to determine whether the student has met the competency requirements. If for some reason a student does not have such scores, other screening(s) may occur. The screenings described below may be used for students who transfer into the North Carolina system after grade 8:

Nationally-normed Tests

- Scores from a standardized, nationally-normed test, normed on a sample representative of the public school population in 1992 or later may be used for competency screening. Scores from grade 8 or later are preferred. The cut scores for screening for these tests are:
  - Reading: at or above the 50th national percentile.
  - Mathematics: at or above the 50th national percentile.

PSAT or SAT

- The following PSAT or SAT scores may be used for competency screening:
  - Reading: at or above a verbal score of 40 on the PSAT, 400 on the SAT (48 and 480 on the recentered scale).
  - Mathematics: at or above a mathematics score of 45 on the PSAT and 450 on the SAT (48 and 480 on the recentered scale).

Seventh Grade End-of-Grade Tests

- In the event that EOG scores, scores from nationally-normed tests, and scores from the PSAT or SAT are not available, seventh grade EOG scores may, as a last resort, be used for screening purposes. Acceptable scores are the same as for grade 8:
  - Reading: at or above a scale score of 156.
  - Mathematics: at or above a scale score of 165.

Strategies and Interventions Implemented to Increase Performance

- The North Carolina Department of Public Instruction (NCDPI) has provided a NC *Competency Resource Guide* that provides information to educators working to provide remedial instruction to students who have failed the tests.
- Competency handbooks have been provided to LEAs for students to use to get an understanding of what the tests are like and to provide information about the requirement.
- In addition, resources such as testlets, the item bank, flyers, and training on how to use the competency resource guidebook have been made available to LEAs.
- Of those LEAs reporting on strategies and interventions implemented in order to improve students' performance on the Competency Standard, the most popular interventions were remediation classes conducted during the school day (84%), informing teachers (84%), guidance counselors (79%) and parents (78%). The use of practice tests and similar materials provided by NCDPI was also a popular strategy (75%), as was attention to test-taking skills and strategies.
- Of the reported strategies and interventions, those rated most effective by the LEAs were use of the practice tests (88%), remedial instruction classes (82%) and use of a mentor/mentee program (82%). Informing the guidance counselor was reported effective by 79% of reporting LEAs, while 76% of LEAs reported switching to 4 x 4 block scheduling as effective in improving performance on the Competency Standard.

State Results by Ethnicity for Eighth Grade

- The eighth grade end-of-grade tests in reading and mathematics provide the first opportunity for students to meet the competency requirement. During the 1998-99 school year, 68.6 percent of eighth-grade students in North Carolina met the standard.

State Results by Ethnicity for Eighth Grade (continued)

- Results by ethnicity for eighth graders varied with the White student subgroup having the highest percent of students passing and the Hispanic student subgroup having the lowest percent of students passing. The percents passing for each subgroup were: 44.7 percent of Hispanic students, 47.2 percent of Black students, 54.5 percent of American Indian students, 69.9 percent of Asian, 73.2 percent of Multi-Racial, and 79.5 percent of White students.

State Results by Ethnicity for Ninth Grade

- Students who have not met the eighth-grade proficiency or screen are required to take the North Carolina Competency Test of Reading and the North Carolina Competency Test of Mathematics as one requirement for a North Carolina high school diploma. Approximately 74.6 percent of the students passed the competency requirement by the end of the ninth grade. Results by ethnicity varied with Hispanic students having the lowest percent of students passing and Whites have the highest percent passing by the end of the ninth grade.

- Approximately 52.4 percent of Hispanic students, 58.4 percent of Black students, 60.3 percent of American Indian students, 71.0 percent of Asian students, 76.8 percent of Multi-Racial students, and 83.8 percent of White students passed the competency requirement by the end of the ninth grade.

State Results by Ethnicity for Tenth Grade

- According to legislation, all students who have not achieved a passing score must be provided the opportunity to take the competency tests by tenth grade. During the 1998-99 school year, approximately 84.3 percent of the students passed the requirement by the end of the tenth grade.

- When viewing the results by ethnic group, a disparity continues to exist among the subgroups. Approximately, 70.4 percent of Hispanic students passed the requirement while 90.4 percent of White students passed the requirement by the end of the tenth grade.

- The percents passing for each subgroup by the end of tenth grade were: 70.4 percent of Hispanic students, 71.2 percent of American Indian students, 72.0 percent of Black students, 79.6 percent of Asian students, 84.3 of Multi-Racial students, and 90.4 percent of White students.

State Results by Ethnicity for Eleventh Grade

- For the 1998-99 school year, approximately 89.0 percent of students passed the competency standard by the end of eleventh grade. The largest disparity exists between the American Indian subgroup and the White subgroup. Approximately, 78.3 percent

of American Indian students passed the requirement while 92.8 percent of White students passed the requirement by the end of the eleventh grade.

- The percents passing for each subgroup were: 78.3 percent of American Indian students, 80.5 percent of Hispanic students, 81.1 percent of Black students, 82.9 percent of Asian students, 86.8 of Multi-Racial students, and 92.8 percent of White students.

State Results by Ethnicity for Twelfth Grade

- For the 1998-99 school year, approximately 92.8 percent of students passed the competency tests in twelfth grade. From eighth grade to twelfth grade, the percents passing increased for all subgroups. In addition, the number of students in membership decreases significantly from 83,802 students at grade 8 in 1994-95 to 61,159 students at grade 12. Class of 1999 membership decreased 27 percent from grade 8 to grade 12.

- The percents passing for each subgroup were: 86.7 percent of Hispanic students, 88.3 percent of Black students, 89.1 percent of Asian students, 91.0 percent of American Indian students, 92.3 of Multi-Racial students, and 94.8 percent of White students.

98

99

Notes [1] Students who have passed the new competency standard. Passing may include successful performance on grade 8 EOG test(s), competency test(s), or the competency screen(s).
*Data not reported where Final Membership is fewer than five. The ethnic categories may not sum to Total Number Tested and Total Number Passing because students may not have coded in an ethnic category.
**Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.
Data received from LEAs after March 31, 2000 are not included in this table.

Notes * Students who have passed the new competency standard. Passing may include successful performance on grade 8 EOG test(s), competency test(s), or the competency screen(s).
*Data not reported where Final Membership is fewer than five. The ethnic categories may not sum to Total Number Tested and Total Number Passing because students may not have coded in an ethnic category.
**Denotes a charter school. For reporting purposes the charter school name has been abbreviated. The complete name can be found in the Appendix.
Data received from LEAs after March 31, 2000 are not included in this table.

(excerpted from The North Carolina Competency Test: a handbook for Students Graduating in 1998 or later)

V. Sample Test Questions

North Carolina Competency Test of
Reading and Mathematics

Directions: To answer a question, first decide which is the *best* answer choice for a particular question. Then, find the question number on your answer sheet and make a dark mark in the circle containing the letter of the correct answer. Remember to mark only one answer for each question.

Mathematics Computation Calculators are not allowed on this part of the test because it measures basic mathematical skills and estimation.

Mathematics Applications The use of a calculator is allowed on this part of the test because it measures problem solving. The use of a calculator tends to ensure that students who apply sound mathematical reasoning will not miss a question because of computational errors. You may use any four-function calculator with a square root function or algebraic logic or any scientific calculator on this part of the test. You cannot use a graphing calculator. You are also allowed to use a ruler and protractor. Commonly used formulas (shown below) will be provided on the back of your test book.

Reading This part of the test consists of 10 passages each of which is followed by three to eight questions related to the passage. You will be asked to read four literary passages (such as a short story, a poem, or an excerpt from a play); four content-based passages selected from art, science, health, mathematics and social studies; and two consumer/human interest passages (such as recipes, projects, relevant short pieces from popular magazines). The questions will ask about your strategy for reading the passage, how much you comprehended from the passage, and if you can critically analyze the passage.

Formulas

The following information is for your reference in solving some of the problems on the test.

Rectangular or Triangular Prism with base area (B) and height (h)

Volume = Bh

Circle with radius (r)

Area = πr^2

Circumference = $2\pi r$

Cylinder with radius (r) and height (h)

Volume = $\pi r^2 h$

Surface Area = $2\pi rh + 2\pi r^2$

Pyramid with base area (B) and height (h)

Volume = $\frac{1}{3} Bh$

Total Area = Surface Area + B

Cone with radius (r), height (h), and slant height (l)

Volume = $\frac{1}{3} \pi r^2 h$

Lateral Area = πrl

Total Area = $\pi r^2 + \pi rl$

Use $\pi = 3.14$ or $\frac{22}{7}$

Mathematics Computation

1. Solve: $(2 + 1)^3 + (6 - 4)^2$

   A 13

   B 31

   C 39

   D 55

2. Bert bought a T-shirt that was reduced 25%. If the original price of the T-shirt was $15, how much should Bert pay for the T-shirt including 6% sales tax?

   A $3.98

   B $11.85

   C $11.93

   D $13.10

3. Carrie bought a computer for $789.99, a disc drive for $219.95 and a printer for $312.95. What is the ***best*** estimate of the amount she paid altogether?

   A $1,200

   B $1,300

   C $1,450

   D $1,600

Mathematics Applications

4. Sue's bedroom is 14 ft × 12 ft. The ceiling is 8 ft high. If a can of paint will cover 200 square feet, how many cans will be needed to paint the walls and the ceiling?

   A 2

   B 3

   C 6

   D 7

Even if you use a calculator, you can do scratchwork on paper. It may help to draw a picture first before using the calculator.

5. A photograph measures 1.3 cm wide and 2 cm long. An enlargement similar to the original photograph has a length of 5.4 cm. What is the width of the enlargement?

   A 8.31 cm

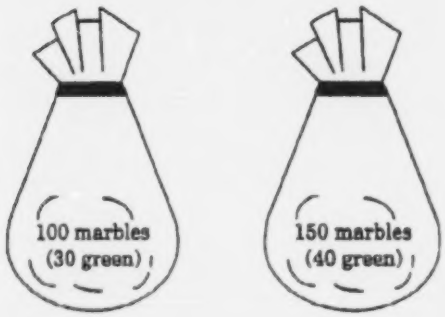
   B 3.51 cm

   C 2.08 cm

   D 0.48 cm

112

6. What is the probability of reaching into a bag without looking and pulling out a green marble?



A greater for Bag 1 than Bag 2

B greater for Bag 2 than Bag 1

C the same for both bags

D cannot be determined from the information given

7. Pentagonal numbers follow this pattern:

Term	Number
1	5
2	12
3	22
4	35

What is the seventh pentagonal number?

A 57

B 62

C 74

D 92

Don't try to use your calculator on every question. Using your calculator too much can cost you time.

8. One dose of Tasty Cough Syrup is 2.5 cm^3. What is the largest number of doses which can be given from a 65.2 cm^3 bottle of Tasty Cough Syrup?

A 24 doses

B 25 doses

C 26 doses

D 27 doses

9. One way to earn money during the summer is to grow and sell vegetables. One person can easily take care of a vegetable bed that measures six feet by eight feet. If the bed needs to be six inches deep, how much topsoil will be needed to fill the bed?

A 24.0 cubic feet

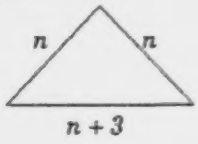
B 28.8 cubic feet

C 48.0 cubic feet

D 288 cubic feet

Commonly used formulas are presented on the back of the test booklet.

10. If the perimeter is 39, what are the lengths of the sides of the following isosceles triangle?



A 12, 12, 15

B 13, 13, 13

C 11, 14, 14

D 9, 15, 15

Ooka and the Stolen Smell

You have probably read a story about stolen money or jewelry, but have you ever read of a stolen smell? Read the following passage to learn how a student stole a smell and how he was punished for this crime.

Now it so happened in the days of old Yedo, as Tokyo was once called, that the storytellers told marvelous tales of the wit and wisdom of His Honorable Honor, Ooka Tadasuke.

This famous judge never refused to hear a complaint, even if it seemed strange or unreasonable. People sometimes came to his court with the most unusual cases, but Ooka always agreed to listen. And the strangest case of all was the famous Case of the Stolen Smell.

It all began when a poor student rented a room over a *tempura* shop—a shop where fried food could be bought. The student was a most likeable young man, but the shopkeeper was a miser who suspected everyone of trying to get the better of him. One day he heard the student talking with one of his friends.

"It is sad to be so poor that one can only afford to eat plain rice," the friend complained.

"Oh," said the student, "I have found a very satisfactory answer to the problem. I eat my rice each day while the shopkeeper downstairs fries his fish. The smell comes up, and my humble rice seems to have much more flavor. It is really the smell, you know, that makes things taste so good."

The shopkeeper was furious. To think that someone was enjoying the smell of his fish for nothing! "Thief!" he shouted. "I demand that you pay me for the smells you have stolen."

"A smell is a smell," the young man replied. "Anyone can smell what he wants to. I will pay you nothing!"

Scarlet with rage, the shopkeeper rushed to Ooka's court and charged the student with theft. Of course, everyone laughed at him, for how could anyone steal a smell? Ooka would surely send the man about his business. But to everyone's astonishment, the judge agreed to hear the case.

"Every man is entitled to his hour in court," he explained. "If this man feels strongly enough about his smells to make a complaint, it is only right that I, as city magistrate, should hear the case." He frowned at the amused spectators.

Gravely, Ooka sat on the dais and heard the evidence. Then he delivered his verdict.

"The student is obviously guilty," he said severely. "Taking another person's property is theft, and I cannot see that a smell is different from any other property."

The shopkeeper was delighted, but the student was horrified. He was very poor, and he owed the shopkeeper for three months' smelling. He would surely be thrown into prison.

"How much money have you?" Ooka asked him.

"Only five *mon*, Honorable Honor," the boy replied. "I need that to pay my rent, or I will be thrown out into the street."

"Let me see the money," said the judge.

"The judge listened to the pleasant clink of the money and said to the shopkeeper, "You have now been paid. If you have any other complaints in the future, please bring them to the court. It is our wish that all injustices be punished and all virtue rewarded."

"But, most Honorable Honor," the shopkeeper protested, "I did not get the money! The thief dropped it from one hand to the other. See! I have nothing." He held up his empty hands to show the judge.

Ooka stared at him gravely. "It is the court's judgment that the punishment should fit the crime. I have decided that the price of the *smell* of food shall be the *sound* of money. Justice has prevailed as usual in my court."

"Ooka and the Stolen Smell" by E.G. Edmonds. Copyright 1961.

1. Why were people astonished and amused when Ooka decided to hear the shopkeeper's complaint?

   A They knew the student was too poor to pay.

   B They thought that the idea of stolen smells was silly.

   C They didn't like the shopkeeper.

   D They knew that Ooka always avoided small cases.

2. The shopkeeper demonstrates that he is a miser by doing what?

   A cooking only fish every day

   B refusing to pay the magistrate

   C trying to charge the student for smelling his fish

   D getting angry at the magistrate's verdict

3. If the story had ended when Ooka declared the student guilty, the moral of the story would have been which of the following?

   A Taking anything that belongs to someone else is stealing.

   B There are big and little crimes.

   C The punishment should fit the crime.

   D Treat others the way you want to be treated.

4. What is the mood of this story at the end?

   A serious

   B sad

   C peaceful

   D lighthearted

5. Which word ***best*** completes this character map?

   A honest

   B fair

   C friendly

   D helpful

There is no deduction for guessing. If you can narrow the answer down to 2 choices, then you have a better chance of choosing the right one.

Answers to Sample Tests and Notes

Mathematics Computation

1. The correct answer is B. This item measures how well you can solve problems (including those with integers) using patterns and algebraic methods without a calculator.

2. The correct answer is C. This item measures your ability to select appropriate operations, strategies, and methods to solve a variety of application problems using real numbers without a calculator.

3. The correct answer is B. This item measures your ability to use appropriate estimation techniques in meaningful situations.

8. The correct answer is C. This item measures your ability to select appropriate operations, strategies, and methods to solve a variety of application problems using realnumbers with a calculator.

9. The correct answer is A. This item measures your ability to find the volume of a prism. You may also be asked to find the surface area of a prism and the volume and surface area of pyramids, cylinders, and cones.

10. The correct answer is A. This item measures how well you can solve problems (including those with integers) using patterns and algebraic methods with a calculator.

Mathematics Applications

4. The correct answer is B. This item measures your ability to find the surface area of a rectangular prism. You may also be asked to find the volume of a rectangular prism and the volume and surface area of pyramids, cylinders, and cones.

5. The correct answer is B. This item measures your ability to solve problems related to similar figures using indirect measures to determine missing sides.

6. The correct answer is A. This item measures your ability to find the probability of simple events using experiments. You may also be asked to find the probability of compound events using computer simulations, random number generators, and theoretical methods.

7. The correct answer is D. This item measures your ability to make and evaluate conjectures and arguments, using deductive and inductive reasoning.

Reading

1. The correct answer is B. This item measures your ability to analyze, synthesize, and organize information and discover related ideas, concepts, or generalizations.

2. The correct answer is C. This item also measures your ability to analyze, synthesize, and organize information.

3. The correct answer is A. This item measures your ability to apply, extend, and expand on information and concepts.

4. The correct answer is D. Similar to questions 1 and 2, this item measures your ability to analyze, synthesize, and organize information, such as literary devices and techniques (mood, setting, simile, etc.).

5. The correct answer is B. This item also measures your ability to analyze, synthesize, and organize information. A character map is used to organize the information so that relationships can be easily understood.
